Source: FEMA/USFA and NFPA Survey of the Needs of the US Fire Service

The above projections are based on 69 departments reporting on the indicated questions. Type of department is broken into four categories. All-career departments are comprised of 100% career firefighters. Mostly-career departments are comprised of 51 to 99% career firefighters, while mostly-volunteer departments are comprised of 1 to 50% career firefighters. All-volunteer departments are comprised of 100% volunteer firefighters. Numbers may not add to totals due to rounding.

The Fire Service Needs Assessment Survey was sent only to departments with administrative and reporting responsibilities, in order to minimize double-counting. This means that the total number of departments we contacted may be much lower than the total number of departments in the state, as reflected in the state's own records.

Q. 1: Population (number of permanent residents) your department has primary responsibility to protect (excluding mutual aid areas)

Q. 7: Total number of full-time (career) uniformed firefighters

Q. 8: Total number of active part-time (call or volunteer) firefighters
