Don’t Let Your World Go Up In Smoke.

Home Fire Safety Tips For Smokers
Prevent home fires.
Protect what matters.

Smoking is the number 1 cause of home fire deaths across the country. You can prevent fires caused by cigarettes and other smoking materials by being a fire-safe smoker.

Protect

Always smoke outside, and never smoke in bed. Many things in your home can catch on fire if they touch something hot like a cigarette or ashes.

Prepare

Have working smoke alarms on every level of your home. You should have a smoke alarm inside bedrooms and outside sleeping areas. Test your smoke alarms every month to make sure they are working.

Plan

Make a fire escape plan. If there is a fire, you may have less than 3 minutes to get out of your home. Talk about what you should do if there is a fire.
