

Focus on Fire Safety

FEMA

U.S. Fire Administration

Disasters and Fire Safety

A wide range of natural disasters occur within the United States every year. Natural disasters can have a devastating effect on you and your home. One aspect of disasters that is often overlooked is the risk of fire. For this reason, and the fact that in any of these events it is imperative for citizens to know the proper steps to take to ensure fire safety and prevention for themselves and their families, the U.S. Fire Administration is focusing on preparing families and homes to deal with disaster in a “fire safe” way.
