Don’t Let Your World Go Up In Smoke.

Fire Safety Tips

U.S. Fire Administration  FEMA
Prevent home fires. Protect what matters.

Protect
Always smoke outside, and never smoke in bed. Many things in your home can catch on fire if they touch something hot like a cigarette or ashes.

Prepare
Have working smoke alarms on every level of your home. You should have a smoke alarm inside bedrooms and outside sleeping areas. Test your smoke alarms every month to make sure they are working.

Plan
Make a fire escape plan. If there is a fire, you may have less than 3 minutes to get out of your home. Talk about what you should do if there is a fire.
