

National Fire Department Registry Summary

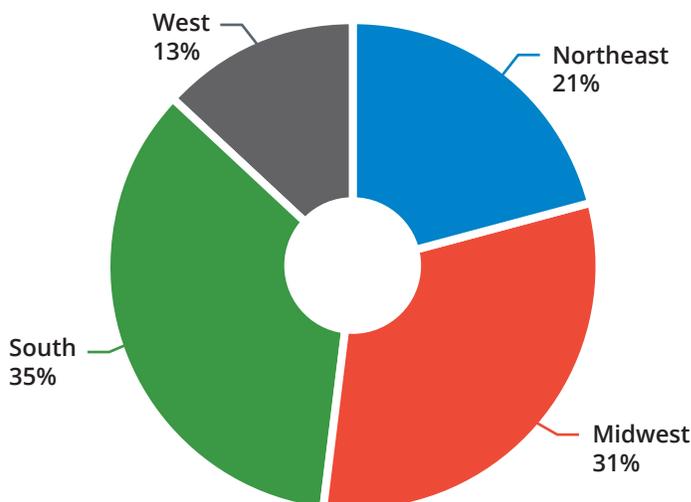

Fire departments

The U.S. Fire Administration's National Fire Department Registry is a voluntary program, and it does not include all fire departments in the U.S. or its Territories. As of January 2017, there were 27,192 registered fire departments, which constitute about 91 percent of the departments estimated to be in the U.S. The National Fire Protection Association (NFPA) estimated that there were 29,980 fire departments in the U.S. in 2014, the latest available estimate at the time of this analysis.

Fire departments by region

The majority of registered departments are located in the Southern and Midwestern states. Figure 1 shows the percentage distribution of fire departments by U.S. Census Bureau region.¹ Less than 1 percent of the registered fire departments are located in the U.S. Territories.

¹The regions of the U.S. are defined by the U.S. Census Bureau as the Northeast (Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont); South (Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia); Midwest (Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin); and West (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming).

Stations

The registered departments represent 50,860 fire stations across the country.² Of the registered departments, 69 percent have one station, 17 percent have two stations, and the remaining 14 percent have three or more stations.

Organization type

The majority (96 percent) of registered departments are local fire departments that include career, combination and volunteer fire departments and fire districts. The remaining 4 percent are comprised of state and federal government fire departments, contract fire departments, private or industrial fire brigades, and transportation authority or airport fire departments.

Personnel

The registered fire departments are staffed by 1,215,300 personnel.³ This figure includes career, volunteer and paid-per-call firefighters, as well as civilian staff and nonfirefighting personnel. There were a total of 1,064,400 active career, volunteer and paid-per-call firefighters representing 88 percent of the registered departments' personnel. Of the active firefighting personnel, 32 percent were career firefighters, 56 percent were volunteer firefighters, and 12 percent were paid-per-call firefighters.

²For counties in Maryland, Nevada and Virginia where it is known that both the county-level fire department registered, and the individual fire departments affiliated with that county department also registered, the computation of the number of stations includes only the number of stations reported by the county-level department to avoid double counting stations.

³There were 104 fire departments that did not provide the number of active firefighting personnel. These departments were excluded from this analysis. Additionally, for counties in Maryland, Nevada and Virginia where it is known that both the county-level fire department registered, and the individual fire departments affiliated with that county department also registered, the computation of the number of personnel includes only the personnel counts reported by the county-level department to avoid double counting personnel. Numbers of personnel were rounded to the nearest 100.

Department type

The department type is based on NFPA definitions. (Career — 100 percent of a department's firefighters are career. Mostly career — 51 to 99 percent of a department's firefighters are career. Mostly volunteer — 1 to 50 percent of a department's firefighters are career. Volunteer — 100 percent of a department's firefighters are volunteer.)⁴ Of the registered fire departments:

- ◆ Career departments constitute 9 percent.
- ◆ Mostly career departments constitute 4 percent.
- ◆ Mostly volunteer departments constitute 16 percent.
- ◆ Volunteer departments constitute 71 percent.

Department type by state

Table 2 shows the percentages of registered fire departments by department type within states. The department type is based on NFPA definitions.

Specialized services

Table 3 shows the percentage of registered fire departments that indicated providing a particular specialized service. The leading specialized services provided include vehicle extrication (76 percent), fire/injury prevention and public education (62 percent), wildfire/wildland urban interface (WUI) (62 percent), and basic life support (BLS) services (58 percent). Only 4 percent of registered departments have fireboat service capabilities. Of the departments that provide fire investigation/fire-cause determination services, 18 percent have sworn investigators with power to arrest.
